

## **International Reference Life Cycle Data System (ILCD): Quality compliance rules for the ILCD Data Network**

- *Work in progress / under consultation:* For Process data sets this covers the technological, geographical and time-related representativeness as well as completeness and precision of the inventory. For Process data sets the requirements are specified in the ILCD Handbook “guidance document on generic/average LCI data sets” and for LCIA method data sets in the “LCIA guidance” document. They will be summarised as a check-list in this separate document.

**Disclaimer:** This document is in preparation and its drafts will undergo several consultation steps. As soon as a next version becomes available it supersedes the preceding version.
