

## **International Reference Life Cycle Data System (ILCD): Review compliance rules for the ILCD Data Network**

- *Work in progress / under consultation:* This document will define the necessary minimum requirements on critical review of Process and of LCIA method data sets. They are specified in the “Accredited certification scheme for LCA” and related documents in the part relating to generic/average LCI data sets, producer-specific LCI data sets, and LCIA methods, respectively. They will be summarised as a check-list in this separate document.

**Disclaimer:** This document is in preparation and its drafts will undergo several consultation steps. As soon as a next version becomes available it supersedes the preceding version.
